

Effective information management is at the core of providing best in class health care services regardless of the size of the service provider. Without a robust technology based information management solution it is difficult for a provider to generate strong revenues while excelling in providing services to its customers.

Automation in the health care business needs to bring benefits to both the patient and the health care provider. **EMPRESA Health Care** is an extension to the powerful **EMPRESA CORE** business solution. It hosts robust features and reporting capabilities for hospitals and clinics and leverages best practices across other industries with its strong integration with the **EMPRESA CORE**.
